(54) NET BAG FOR WASHED ARTICLE AND MANUFACTURE THEREOF

(57)Abstract:

PURPOSE: To economize the labor for cutting and sewing and carry-in/out of a washed article in simple ways by installing an opening/closing means onto a part where the edge parts are sewed or attached or a part of a cloth.

CONSTITUTION: A net bag for washing which has a fastener opening/closing means 2 for the opening and closing for taking-in/out a washed article is prepared by sewing a planary net cloth which is cut to a specific shape. The edge part is formed from arcuate edges A-J from the net cloth, and a cloth 1 having each equal shape and length of each arcuate edge is cut. The arcuate edges A and D, B and C, F and G, H and I, and straight edges E and J of the cut cloth 1 are sewed or attached, and then a net bag is formed. Since the fastener opening/closing means 2 is installed at the part where the edge parts are sewed or attached or a part of the cloth, the net bag from which a washed article can be easily taken in/out can be obtained.
